

Care After Minor Biopsy of the Skin

1. Cleanse the incision with Peroxide three times daily for 3 days.
2. Cleanse with Peroxide once daily thereafter until healed.
3. Apply Polysporin Ointment after each cleansing.
4. Pain is managed with ibuprofen or acetomenophen. Follow product directions.
5. Keep your appointment to see the doctor.
6. Call us for: bleeding, redness, pus discharge, pain.
