## WHY LASER SCAR TREATMENT IS THE PREFERRED CHOICE OVER SURGICAL SCAR REMOVAL

- Little to no downtime
- Simple procedure with minimal discomfort
- Quick, non-invasive treatment
- Excellent aesthetic result

## ADVANTAGES OF LASER STRETCH MARK TREATMENTS

- Smooth, better looking skin without surgery
- No treatment downtime
- Improved skin appearance
- Comfortable treatment sessions
- Minimal side effects
- FDA-approved product

Stretch marks and scars are an unfortunate fact of life. There is no need in trying to keep them covered up or hiding them with make-up or clothing when you can reduce their appearance or even eliminate it with laser treatments.

Fractional laser treatment for scars is more a more comfortable alternative to surgery for acne scars and surgical scars, with remarkable results on any skin type, including very light and very dark skin.

For stretch marks, this fractional laser treatment will give you that smooth, clear, touchable skin you've been wanting. Laser stretch mark treatment uses pulses of fractional laser light to break down stretch marks and improve the appearance of your skin. And, it can take just a few simple treatments.

## FREQUENTLY ASKED QUESTIONS

### *What types of scars can be treated?*

Laser scar treatment is appropriate for surgical scars and acne scars on any area of the body, including the face.

### *How do I know if I am a good candidate for these procedures?*

Scar and Stretch Mark Laser treatment works on any skin types, including very light and very dark skin. Dr. Humphreys will discuss all of the treatment options with you.

### *How does it work?*

Dr. Humphreys uses a laser that uses "fractional" pulses of laser light to break down scar and stretch mark tissue and help generate healthy new tissue, light in color and more even in texture. It reduces the appearance of the stretch mark on the skin.

### *How quickly will I recover?*

Usually you can resume regular activities the same day.

### *How long does treatment take?*

Most treatments are performed in as little as 30 minutes, depending on the size of the treatment area.

### *How many treatments will I need?*

Most people need three to five treatment sessions for optimum results.

### *Does it hurt?*

Most people feel minimal discomfort during the procedure. Dr. Humphreys will discuss pain management with you.

### *What can I expect after treatment?*

Typically, most people experience a temporary redness and swelling at the treatment site, which typically lasts only a few days. Dr. Humphreys will discuss all of the options with you during your consultation and sessions.
